

LAURENȚIU STĂNCIOIU

AI Engineer

✉ laurentiu.stancioiu@gmail.com 🌐 Portfolio 🔄 GitHub 🔗 LinkedIn 🗨 HuggingFace 📍 Cluj-Napoca, Romania

SUMMARY

AI Engineer specializing in NLP and tabular data, building production agents and LLM systems for enterprises across Germany. Quick POCs, fast feedback loops, iterative development from POC to MVP to production. Cloud-agnostic — AWS, Azure, GCP.

EXPERIENCE

Senior AI Consultant Bosch Service Solutions · Timișoara, Romania	01/2026 — Present
▸ Building A2A-protocol compliant agents on Google Cloud (Cloud Run, BigQuery, Gemini, Terraform) for enterprise customers. ▸ Expanding into n8n-based workflow automation for enterprise agent orchestration.	
AI Consultant Bosch Service Solutions · deployed at Aleph Alpha · Timișoara, Romania	04/2024 — 01/2026
▸ Built an internal enterprise chatbot with a team of four, leveraging RAG and LLMs. ▸ Worked on Creance.ai — AI-powered DORA compliance (PwC joint venture). Built pandas + Dagster evaluation pipelines to govern LLM behavior. creance.ai ▸ Developed an AI agent for sensitive technical documentation at a global chip manufacturer — 90% search time reduction (OCR, Small LLMs, MCP). ▸ Built a multi-agent system that researches power tools, analyzes Amazon reviews and web opinions, then recommends new features (LangGraph, Firecrawl, Tavily). Won 1st place in an internal competition. ▸ Developed a security ticket classification and explanation system using LLMs. ▸ Built a legal document classification system (Angular + Python) for a major European retailer, with CI/CD via GitHub Actions. ▸ Built a POC agent that reads SAP release notes via Playwright, interprets changelogs, and adjusts SAP configurations when updates require it.	
Junior Data Engineer → Data Engineer RWS Group · Cluj-Napoca, Romania	11/2022 — 04/2024
▸ Developed TradosAI, a RAG-based AI assistant for user inquiries — built the data pipeline, AI system, and internal content management platform. ▸ Created a model combining transformers with traditional ML to route questions to the appropriate forum, optimizing search accuracy. ▸ Improved sentiment model deployment on AWS — 15× cost reduction while maintaining response time. ▸ Launched a microservice generating alt-text for images in community posts.	
Research Intern National Institute of Isotopic and Molecular Technologies · Cluj-Napoca, Romania	08/2020 — 05/2022
▸ Contributed to two published articles and a poster on Raman spectroscopy and computational molecular analysis.	

EDUCATION

Bachelor of Engineering Physics Applied Engineering Sciences <i>Babeș-Bolyai University, Cluj-Napoca</i>	2018 — 2022

TECHNOLOGY STACK

Python	LangGraph	Dagster	A2A Protocol	MCP	Gemini	Google Cloud	Cloud Run	BigQuery	Terraform	AWS	Azure	Angular
Playwright	Firecrawl	Tavily	Pandas	Docker	GitHub Actions	n8n	SvelteKit	TypeScript	OCR	RAG		

SKILLS

- AI Agent Development
- Multi-Agent Systems
- LLM Evaluation
- Document Processing
- Client Consulting

CERTIFICATION

- ML in Python with scikit-learn — Inria (2022)
- SAS Visual Analytics for SAS Viya

VOLUNTEERING

- Leader of Beavers (2016—2023) — Romanian Scout Organization. Organized activities and trips for children aged 7–10.
